

**AEROCHAMBER MAX® VHC
W/MOUTHPIECE NOW WITH FLOW-VU™
INSPIRATORY FLOW INDICATOR**

In January 2004 Trudell Medical International launched the new **AeroChamber MAX®** Valved Holding Chamber (VHC) line featuring two new enhancements: the **Flow-Vu™** inspiratory indicator and the **StatBan™** anti-static polymer chamber. At that time the **Flow-Vu™** indicator was offered on masked products only. **We are now pleased to announce that the Flow-Vu™ indicator has been added to the AeroChamber MAX® VHC w/Mouthpiece product.**

When the **Flow-Vu™** indicator moves from the vertical position toward the patient, the patient is inhaling. As the patient exhales or stops inhaling, the **Flow-Vu™** indicator returns to the vertical position. By following the movement of the **Flow-Vu™** indicator, the patient or caregiver can actuate the pMDI in unison with the patient's inspiratory flow and then accurately count each patient breath.

The addition of the **Flow-Vu™** inspiratory flow indicator feature is the **only** change to the product. Price, UPC, package size and carton shipping quantities remain unchanged.

Trudell Medical International continues to break new ground with our **AeroChamber®** VHC line of products, the industry's only full line of holding chambers designed to offer highly effective delivery outcomes for specific patient populations.

COMBIGAN'S GOT YOU COVERED!

Allergan is pleased to inform you that effective immediately **COMBIGAN®** (brimonidine tartrate 0.2%/timolol maleate as timolol 0.5%) ophthalmic solution is listed on the **Newfoundland and Labrador Prescription Drug Program (NLPDP)** as a full benefit.

COMBIGAN® (brimonidine tartrate 0.2%/timolol maleate as timolol 0.5%) ophthalmic solution is indicated for the control of intraocular pressure in patients with chronic open-angle glaucoma or ocular hypertension who are insufficiently responsive to IOP reducing monotherapy AND when the use of **COMBIGAN®** is considered appropriate¹.

COMBIGAN® provides statistically enhanced efficacy compared to brimonidine or timolol monotherapy, and has a safe and favorable safety profile with no unexpected adverse events.² **COMBIGAN®** is dosed BID for simple, convenient, dual therapy that can potentially improve patient compliance.

Allergan is proud to offer the province of Newfoundland and Labrador a new option for patients suffering from open angle glaucoma or ocular hypertension.

For more information please contact **Allergan's Product Information department at 1-800-668-6424.**

¹ COMBIGAN® Product Monograph. Allergan Canada, 2001.
² Craven ER et al. One year comparison of efficacy and safety of brimonidine 0.2%/Timolol 0.5% fixed combination vs brimonidine 0.2% or timolol 0.5% monotherapy. Poster presented at: The Annual Meeting of the American Academy of Ophthalmology, October 20-23, Orlando, Fla.

COMBIGAN'S GOT YOU COVERED!

Allergan is pleased to inform you that effective immediately **COMBIGAN®** (brimonidine tartrate 0.2%/timolol maleate as timolol 0.5%) ophthalmic solution is listed on the **Non-Insured Health Benefit Program** as a full benefit.

COMBIGAN® (brimonidine tartrate 0.2%/timolol maleate as timolol 0.5%) ophthalmic solution is indicated for the control of intraocular pressure in patients with chronic open-angle glaucoma or ocular hypertension who are insufficiently responsive to IOP reducing monotherapy AND when the use of **COMBIGAN®** is considered appropriate¹.

COMBIGAN® provides statistically enhanced efficacy compared to brimonidine or timolol monotherapy, and has a safe and favorable safety profile with no unexpected adverse events.² **COMBIGAN®** is dosed BID for simple, convenient, dual therapy that can potentially improve patient compliance.

Allergan is proud to offer the NIHB a new option for patients suffering from open angle glaucoma or ocular hypertension.

For more information please contact **Allergan's Product Information department at 1-800-668-6424.**

PANTOLOC® SAMPLE VOUCHER CAMPAIGN

ALTANA Pharma Inc & SOLVAY Pharma Inc in collaboration with Formedic/Prescript are pleased to announce the **PANTOLOC® Sample Voucher Campaign** in the Province of British Columbia.

The vouchers are for clinical evaluation use. When a patient brings in the voucher to your pharmacy, simply bill the codes identified on the voucher. In addition, please remember to **reset the patient's default plan** on your billing software after the transaction.

For any clarification on the **PANTOLOC® Prescript Voucher Campaign**, please call **1-800-668-1608**.

Other

NEW OVERACTIVE BLADDER DISEASE AWARENESS CAMPAIGN

As part of our commitment to educating Canadians about healthy ageing and proactive healthcare, **Pfizer Canada** - the maker of Detrol/Detrol LA, the number one dispensed branded OAB medication in Canada - is proud to tell you about its first-ever disease awareness campaign for **Overactive Bladder (OAB)**.

Although it is estimated that one in five Canadians over the age of 35 suffer from Overactive Bladder, fewer than nine per cent of sufferers have been diagnosed, and most wait an average three years to speak about their condition with their trusted healthcare advisors.

This month, Pfizer Canada is launching television and print advertisements, a new 1-800 consumer education line, and an informative OAB website www.overactivebladder.ca. Pfizer's OAB education and awareness campaign was created in consultation with healthcare practitioners and OAB sufferers to shed light on this under-reported condition and encourage those who suffer from bothersome symptoms to seek help.

New Patient Information and Self-Assessment Tools

In an effort to assist pharmacists and other healthcare professionals in providing quality care as well as accurate and useful information, we've also created new patient self-assessment and educational tools.
