

## What is COLD-FX®?

**COLD-FX®** is a proprietary, patented, naturally sourced product indicated to help reduce the frequency, severity and duration of cold and flu symptoms by boosting the immune system. Each **COLD-FX®** capsule or chewable tablet contains **CVT-E002®**, a patented extract derived from the root of North American ginseng (*Panax quinquefolius*). It is a unique extract rich in polysaccharides (poly-furanosyl-pyranosyl-saccharides) that has been shown in laboratory and clinical studies to stimulate both innate and adaptive immunity and to enhance immune response to cold and flu viral infections. In addition, each batch is standardized with a patented Chemical Biological Fingerprinting (**ChemBioPrint®**) technology to confirm that the chemical identity and biological activity of this product is consistent from batch to batch.

## How does COLD-FX® work?

**COLD-FX®** has been shown to enhance immune response to cold and flu viral infections. Evidence from in vitro and animal studies indicates **COLD-FX®** works in a unique manner by targeting the Toll-like receptors (TLRs)<sup>1-5</sup>. **COLD-FX®** increases the number and enhances the function of immune cells such as macrophages and natural killer (NK) cells within both the innate and adaptive immune systems. These molecules are "soldiers" of our immune "army" that fight against (virus or bacteria).

Kenneth Lee Rosenthal, Jennifer Newton and Amy J. Patrick. CVT-E002, a proprietary extract of North American ginseng, activates the vertebrate innate immune system to produce proinflammatory and anti-viral factors via MyD88 signaling. The FASEB Journal vol. 22 no. 2 Supplement 538. April 2008

## How is COLD-FX® different from other ginseng products?

**COLD-FX®** is different from other ginseng products. Its medicinal ingredient **CVT-E002®** consists primarily of polysaccharide extracts from North American ginseng. Other ginseng products have a wide variety of formulations and often consist of crude American ginseng extracts standardized to ginsenosides. Research has shown that these ingredients have a different chemical profile and pharmacological properties. **COLD-FX®** is the only product on the market licensed to make the following claim: **Helps reduce the frequency, severity and duration of cold and flu symptoms by boosting the immune system.**

## Science behind COLD-FX®

**COLD-FX®** is an evidence-based product. The safety and efficacy of **COLD-FX®** has been assessed with more than 10 years of research, including 6 published randomized, double-blinded and placebo controlled clinical trials<sup>1-2,6-10</sup> and 20+ published articles studying the effects of **CVT-E002®**. Together, these clinical trials evaluated the safety and effectiveness in over 1600 subjects and demonstrated that **COLD-FX®** can be used to help reduce the frequency, severity and duration of cold and flu symptoms by boosting the immune system. More specifically, a study by Predy<sup>7</sup> showed daily supplement of **COLD-FX®** led to a:

- ✓ 31% reduction in symptom severity
- ✓ 56% fewer recurrent colds
- ✓ 2.4 day reduction in symptom days

## COLD-FX® and Flu shot

Clinical studies showed a further reduction of cold and flu symptoms when receiving the annual flu shot and taking **COLD-FX®** during the cold and flu season<sup>10</sup>.

### Proven Better Together<sup>10</sup>

Provides further reduction of cold and flu symptoms when taken with a flu shot
