

Voltaren with NoMess applicator:

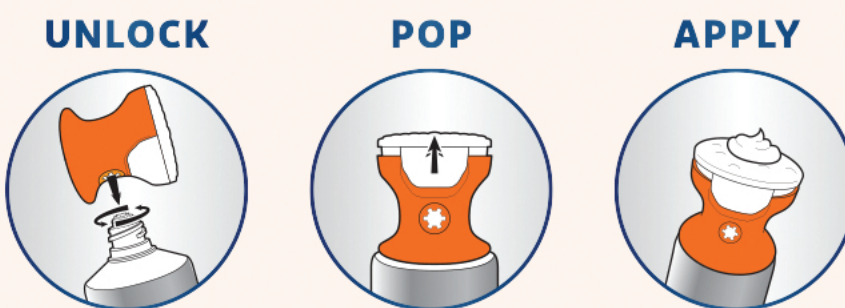

Clinically proven, effective pain relief – now with a mess-free application

NEW NoMess Applicator

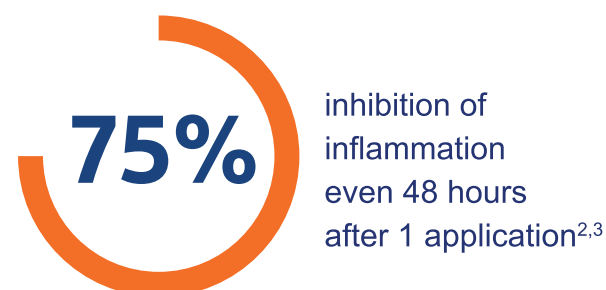

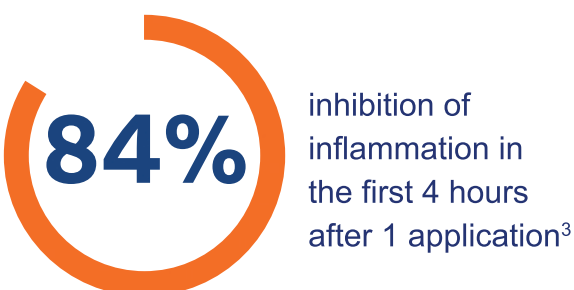

For approximately 30% of patients, the greatest barrier to using topical medicines is physical contact with the gel.¹ Patients state that they find topical medicines too greasy or too messy.¹

Voltaren now solves this problem with the NEW convenient NoMess Applicator. With Voltaren's specially designed cap, your patients can apply and rub in Voltaren directly onto the site of pain without getting gel on their hands.

The innovative NoMess Applicator leaves your patients' hands clean while still delivering the proven efficacy of Voltaren²

In clinical studies, Voltaren has demonstrated:

Now you can recommend a topical pain reliever that provides clinically proven, effective relief – all while leaving your patients' hands clean.²

Voltaren Emulgel Back & Muscle Pain and Voltaren Emulgel Joint Pain Regular Strength (diclofenac diethylamine gel 1.16% w/w) temporarily relieves minor aches and pains due to: muscle and joint sprains, and strains.
