

A Natural Health Product, Proven by Science

What is COLD-FX®?

COLD-FX® is a proprietary, patented, Natural Health Product indicated to help reduce the frequency, severity and duration of cold and flu symptoms by boosting the immune system. Each **COLD-FX®** capsule or chewable tablet contains **CVT-E002®**, a patented extract derived from the root of North American ginseng (*Panax quinquefolius*). It is a unique extract rich in polysaccharides (poly-furanosyl-pyranosyl-saccharides) that has been shown in laboratory and clinical studies to stimulate both innate and adaptive immunity and to enhance immune response to cold and flu viral infections. In addition, each batch is standardized with a patented Chemical Biological Fingerprinting (**ChemBioPrint®**) technology to confirm that the chemical identity and biological activity of this product is consistent from batch to batch.

COLD-FX® and Flu Shot

COLD-FX® provides a further reduction of cold and flu symptoms when taken with the annual flu shot during the cold and flu season¹.

Proven Better Together¹

Provides further reduction of cold and flu symptoms when taken with a flu shot

How does COLD-FX® work?

COLD-FX® has been shown to enhance immune response to cold and flu viral infections. Evidence from in vitro and animal studies indicates **COLD-FX®** works in a unique manner by targeting the Toll-like receptors (TLRs)²⁻⁷. **COLD-FX®** increases the number and enhances the function of immune cells such as macrophages and natural killer (NK) cells within both the **innate** and **adaptive immune systems**. These molecules are "soldiers" of our immune "army" that fight against (virus or bacteria).

How is COLD-FX® different from other ginseng products?

COLD-FX® is different from other ginseng products. Its medicinal ingredient **CVT-E002®** consists primarily of polysaccharide extracts from North American ginseng. Other ginseng products have a wide variety of formulations and often consist of crude American ginseng extracts standardized to ginsenosides. Research has shown that these ingredients have a different chemical profile and pharmacological properties. **COLD-FX®** is the only Natural Health Product in Canada licensed to make the following claim: **Helps reduce the frequency, severity and duration of cold and flu symptoms by boosting the immune system.**

COLD-FX® Clinical Studies

COLD-FX® is an evidence-based product. The safety and efficacy of **COLD-FX®** has been assessed with more than 10 years of research, including 6 published randomized, double-blinded and placebo controlled clinical trials^{1-3,8-10} and 20+ published articles on CVT-E002®. Together, these studies evaluated the safety and effectiveness in over 1600 subjects and demonstrated that **COLD-FX®** can help reduce the frequency, severity and duration of cold and flu symptoms by boosting the immune system. More specifically, a study by Predy⁹ showed daily supplement of **COLD-FX®** led to a[†]:

- ✓ 31% reduction in symptom severity
- ✓ 56% fewer recurrent colds
- ✓ 2.4 day reduction in symptom days
