

NEW

Advil[®] **MINI-GELS**

Advil[®] Mini-Gels offer fast and effective pain relief in a **NEW** mini and **EASY TO SWALLOW** format. They work fast while also targeting the site of pain, and their mini size makes Advil[®] Mini-Gels perfect for easy swallowing.

2 in 5 Canadians may experience some difficulty in swallowing pills.¹

Advil[®] Mini-Gels provide up to 8 hours of pain relief with 2 pills per dose for fast and effective relief of:

- ☒ Headaches
- ☒ Fever symptoms
- ☒ Muscle pain
- ☒ Joint pain
- ☒ Pain of inflammation

200 mg Ibuprofen
Now available in sizes of 30, 70, 110

Mechanism

Ibuprofen, like all nonsteroidal anti-inflammatory drugs (NSAIDs), is an analgesic, antipyretic, and anti-inflammatory medication. Ibuprofen is rapidly and almost completely absorbed. Peak serum concentration occurs within 1-2 hours in adults². Advil[®] Mini-Gels contain solubilized ibuprofen which has peak serum concentrations at 60 minutes².

Efficacy/Clinical Information

There is considerable evidence in the world literature documenting the efficacy of 200 and 400 mg doses of ibuprofen in treating mild to moderate pain², including sore throat pain, headache, muscle aches, dysmenorrhea, and dental pain. The antipyretic efficacy of ibuprofen has been demonstrated in adults at doses of 200 and 400 mg.
